SUPERCUT is a machine made for cutting radial loose components and, with an optional adapter, also taped components.

It is extremely compact and sturdy and all mechanical parts have been designed to ensure the highest quality and the longest possible life.

The loading of components is easy and guick, and the production is high because there is no down time due to the automatic transfer and ejection of the components.

The transfer speed is adjustable.

The small sliding door in front allows for lead length adjustements. There is an optional adapter for radial taped components.

BR3

SUPERCUT/LN5

This pneumatic machine is designed to cut/trim almost every type radial lead components.

The guillotine cutting system, with zero clearance between the plates, guarantees a sharp and precise cut without burrs or damage to the leads.

It is possible to cut many components at the same time without any It is possible to cut many components at the came and the risk of wear of the blades. The machine can be supplied with special cutting jig. An additional optional plate (thickness to be specified , max 3mm)

can be supplied to increase the cutting height of the leads. Two models available, the first with a cutting area 53x43mm, the second with a cutting area 53x93mm.
